## Monthly newsletter

Warsaw, 20 March 2013

# January 2013

At the end of January 2013 State Treasury (ST) debt amounted to PLN **814,403.5** million (about EUR 194.5bn / USD 263.8bn, with exchange rate of January 31, 2013: 1 EUR = 4.1870 PLN, 1 USD = 3.0874 PLN).

In comparison with December 2012 ST debt increased by PLN 20,550.4 million (2.6%). From December 2011 to December 2012 ST debt increased by PLN 22,725.6 million (2.9%).

Table 1 presents factors affecting change in ST debt. An increase in debt in 2012 was mostly a net result of financing the state budget borrowing requirements (increase of debt by PLN 37.4 bn) and strengthening of Polish zloty (decrease of debt by PLN 21.3 bn). The increase of debt in January 2013 was mainly connected with financing the state budget deficit and EU funds budget deficit and increase of funds on the state budget account.

Tables 2 and 3 present – respectively – the breakdown of ST debt by instrument and by holder.

The share of foreign debt in total State Treasury debt increased from 31.6% at the end of 2012 to 32.1% at the end of January 2013.

Between December 2008 and January 2013 the share of foreign investors (non-residents) in the State Treasury debt increased from 34.4% to 54.8%.

The most significant group of creditors (with the share in domestic debt of about 47%) is the domestic non-banking sector (primarily non-banking financial institutions).

The share of foreign investors in the domestic debt increased from 35.1% at the end of 2012 to 35.4% at the end of January 2013.

The vast majority of State Treasury debt is fixed-rate (82.9%), mostly non-indexed (fixed-income) instruments.

Non-marketable instruments, that collectively account for 9% of the State Treasury debt, include mainly foreign loans, deposits and savings bonds.

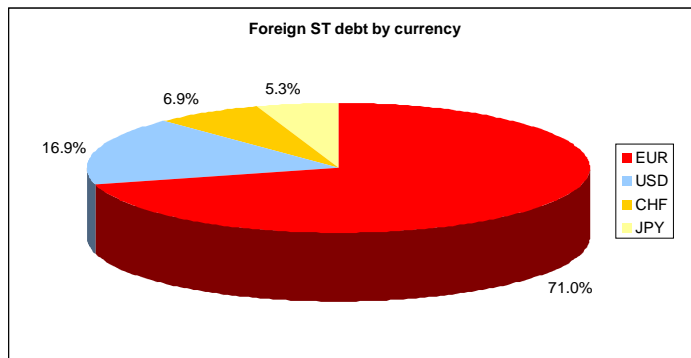

Marketable bonds are the vast majority (95.3%) of domestic debt. The share of Treasury bills decreased from 12.0% at the end of 2008 to 1.5% in January 2013.

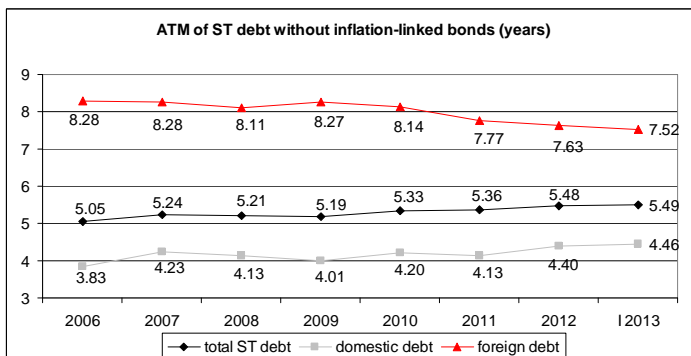

International bonds (78.9%) and loans from international financial institutions (21.0%) collectively account for 99.9% of foreign debt.

About 68% of State Treasury debt is denominated in Polish zloty and about 23% in euro.

71.0% of foreign debt is denominated in euro.

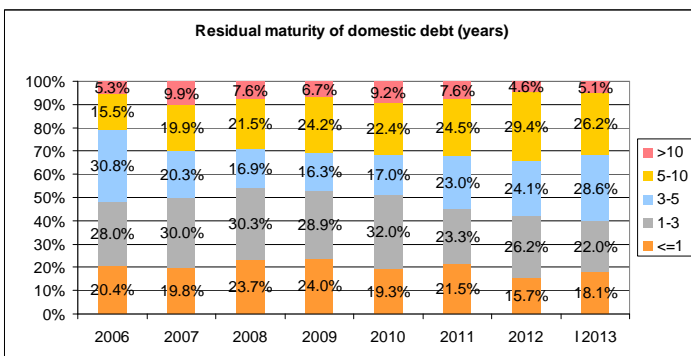

In 2012 the **refinancing risk** of State Treasury debt was reduced: average term to maturity (ATM) of State Treasury debt increased from 5.40 years to 5.49 years and ATM of domestic debt increased from 4.25 years to 4.47 years (in January 2013 there was further increase to 5.50 years and 4.52 years respectively). ATM excluding inflation-linked bonds is currently close to ATM that includes inflation-linked bonds.

Average time to re-fixing (ATR) of State Treasury debt remained almost unchanged in 2012 (decrease by 0.03 years). This indicates a stable level of **interest rate risk**. In the same period duration of domestic debt increased from 2.80 years to 3.01 years while duration of State Treasury debt increased from 3.52 years to 3.81 years. The main reason of duration increase in 2012 was interest rate decrease on foreign markets. In January 2013 duration of ST debt increased to 3.88 years.

Debt with residual maturity of up to 3 years accounted for 33.5% of State Treasury debt (35.0% at the end of 2012) while debt with residual maturity of up to 1 year accounted for 14.5% of State Treasury debt.

Debt with residual maturity of up to 3 years accounted for 40.1% of domestic debt (41.9% at the end of 2012) while debt with residual maturity of up to 1 year accounted for 18.1% of domestic debt.

**Maturity profile of domestic debt as at the end of January 2013**

**Maturity profile of foreign debt as at the end of January 2013**
