

Republic of Poland

Public debt 3Q2014

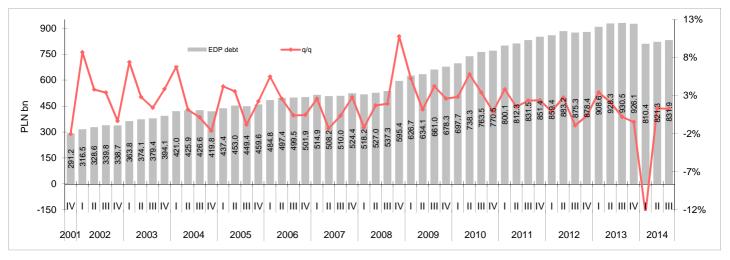

Quarterly newsletter

- 1. At the end of the third quarter of 2014 consolidated **public debt (according to domestic methodology)** stood at **PLN 802,127.1 million***. Compared with the end of the second quarter of 2014 public debt increased by PLN 8,570.8 million (1.1%).
- 2. Increase of public debt in the third quarter of 2014 resulted from:
- increase of central government sector debt by PLN 7,836.2 million (State Treasury debt increased by PLN 7,804.0 million),
- increase of local government sector debt by PLN 779.3 million (local government units debt decreased by PLN 673.0 million),
- decrease of social security sector debt by PLN 44.7 million.
- 3. In the first three quarters of 2014 public debt fell by PLN 80,165.8 million. The change resulted mainly from the cancellation of ST securities in February 2014 as a result of pension system reform. That operation resulted in one-off reduction of ST debt by PLN 130,187.6 million. Excluding the effect of cancellation of ST securities (regardless of its influence on debt servicing costs) public debt increased by PLN 50,021.8 million.
- 4. At the end of the third quarter of 2014 unconsolidated public debt stood at PLN 872,434.4 million. Compared with the end of the second quarter of 2014 debt increased by PLN 13,818.2 million (1.6%) and compared with the end of 2013 decreased by PLN 72,786.3 million (7.7%).
- 5. At the end of the third quarter of 2014 **general government debt** (EDP debt, part of the government finance Maastricht criterion) was at **PLN 831,854.6 million***. Compared with the end of the second quarter of 2014 EDP debt increased by PLN 10,509.0 million (1.3%) and compared with the end of 2013 EDP debt decreased by PLN 94,248.5 million (10,2%).
- 6. Similarly to public debt measured according to domestic methodology, the change in EDP debt in 2014 resulted mainly from changes in State Treasury
- 7. Table 1 presents the differences between public debt according to domestic definition and general government debt.

Public debt

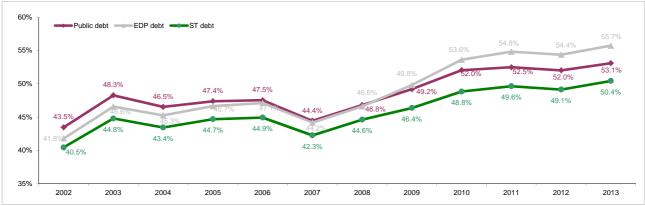

EDP debt

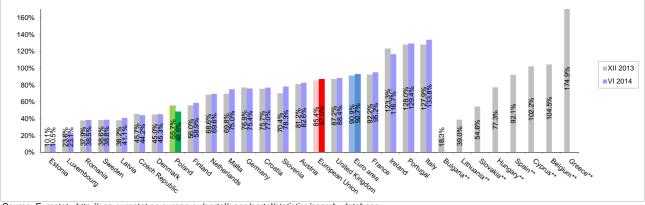

^{*} Data regarding the second quarter of 2014 are preliminary. Data regarding previous periods were updated if necessary. In particular, the EDP debt was revised due to changes in the scope of the general government sector according to ESA2010.

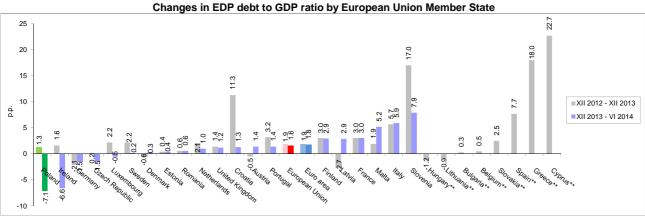

Public debt, EDP debt and State Treasury debt to GDP* ratios (eop)

^{**} data for second quarter 2014 not available

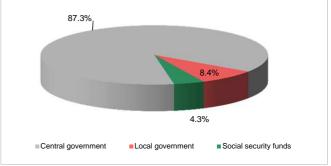

Public debt by sub-sector:

consolidated

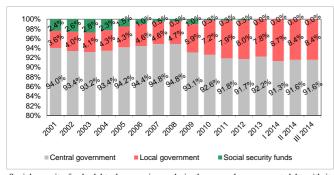

The central government is by far the most important debt issuer, representing 91.6% of public debt, of which 91.3% represents State Treasury debt. The local government subsector contribution was 8.4% of the total debt, of which 8.0% represents debt of local government units and their unions.

unconsolidated

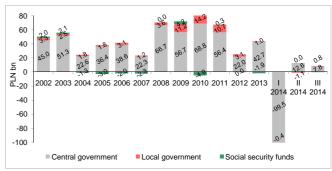

The central government and State Treasury made up 87.3% and 87.1% of the total unconsolidated public debt respectively. Unconsolidated social security funds debt includes loans granted by State Treasury (PLN 37.7 bn at the end of the third quarter of 2014), hence larger contribution of SSF to unconsolidated public debt.

Consolidated public debt by sub-sector

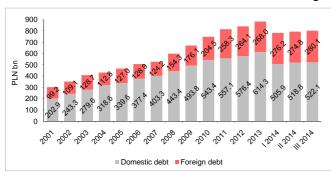

Social security funds debt plays a minor role in the general government debt with its contribution of 0.02% of the total debt, compared to 2.4% at the end of 2001. The ratio of central government sector debt to total debt ramained at the same level - 91.6%.

Changes in consolidated public debt by sub-sector

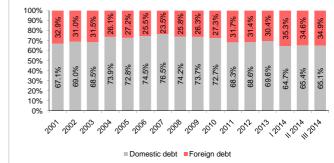

The increase of public debt in the third quarter of 2014 (by PLN 8.6 bn) was a result of central and local government debt increase by PLN 7.8 bn and 0.8 bn respectively. In the first three quarters of 2014 central government debt decreased mainly as a result of pension system reform by PLN 79.1 bn. In the same period local government debt decreased by PLN 0.8 bn largely due to decrease of debt of local government units and their unions in the first half of 2014.

Public debt according to the place of issue criterion

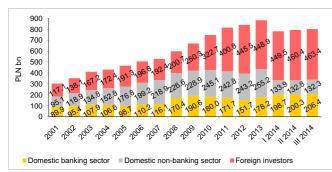

At the end of the third quarter of 2014 domestic debt stood at PLN 522.1 bn, up by PLN 3.3 bn (2.5%) compared with the end of the second quarter of 2014. Foreign debt stood at PLN 280.1 bn, up by PLN 5.3 bn (1.9%).

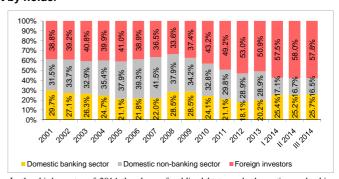

The share of foreign debt in the total public debt increased to 34.9% at the end of third quarter of 2014 (from 34.6% at the end of the second quarter of 2014).

Public debt by holder

In the third quarter of 2014 public debt towards:

- domestic banking sector increased by PLN 6.0 bn (3.0%),
- domestic non-banking sector decreased by PLN 0.4 bn (0.3%),
- foreign investors (non-residents) increased by PLN 3.0 bn (0.6%).

In the third quarter of 2014 the share of public debt towards domestic non-banking sector continued to fall (from 16.7% to 16.5%). The share of public debt towards domestic banking sector rose from 25.2% to 25.7%.
